Start accepting online payments

The WebPay platform is a merchant processing platform specialising in processing online transactions from domestic and international merchants on behalf of acquiring banks. It offers robust modules allowing acquirers to connect with merchants and processors providing a 24x7 mission critical secure payment processing solution.

The WebPay platform supports acquiring banks across Europe, Asia and North America.

The WebPay platform is built on Enterprise class leading database technology and provides a range of services to many financial institutions including, Authorisation, Clearing and Settlement, Merchant Funding, Exception Handling and Full Audit and Reporting Functionality.
